

D-Sub Connector Module

D-Sub Connector Module

D-Subminiature connector modules are used in industrial control as a connecting interface between electronic and conventional components. They serve as the signal conversion from D-Sub to screw connection. The D-Sub connector modules provide user a convenient, quickly installed, and easily replaced input/output platform for all common PLC's.

The standard models offer 9, 15, 25, 37 and 50 connections either in male or female connector type to fit different application. Customer specified design will be accepted for particular requirement. The modules can be mounted on standard mounting rails TS15, TS32, and TS35.

Specification

Unit: mm

Pole	Connector Type	Dimension (L x W x H)
9P	Male / Female	46 x 85 x 52
15P	Male / Female	68 x 85 x 52
25P	Male / Female	92 x 85 x 52
37P	Male / Female	122 x 85 x 52
50P	Male / Female	157 x 85 x 52
